

WorkSafeBC Guidance on Return to Work COR During Review 2014

1. **Net New RTW certifications** (either as part of a new OHS/RTW combined certification, or if RTW is being added to an existing OHS certification)
 - a. The RTW will not be available in 2014.
2. **Maintenance Audits**
 - a. Employers already RTW certified will be allowed to continue doing maintenance audits in 2014, if applicable.
3. **Recertifications**
 - a. These employers will be allowed to recertifying using the existing tool, but will have to transition to the new tool/process once it is available. This may mean recertifying using the new tool prior to the end of their new 3 year certification cycle or adopting the new tool in the middle of the certification cycle. Details to be confirmed once the COR working group is further along with the development of a new tool and any auditor training/certification processes that may be impacted.
